Curriculum Vitae • October 28, 2026

EDUCATION

2009	**Ph.D., Statistics** The Hebrew University of Jerusalem, Israel
2002	**M.A., Statistics and Operations Research** The Hebrew University of Jerusalem, Israel
1999	**B.A., Statistics**, *Summa Cum Laude* The Hebrew University of Jerusalem, Israel

EMPLOYMENT

2024 – present	**Professor**, Department of Mathematics and Statistics University of Maryland, Baltimore County
2017 – 2024	**Associate Professor**, Department of Mathematics and Statistics University of Maryland, Baltimore County
2011 – 2017	**Assistant Professor**, Department of Mathematics and Statistics University of Maryland, Baltimore County
2009 – 2011	**Visiting Fellow**, National Institutes of Health (NIH)
2003 – 2007	**Instructor**, Statistics The Hebrew University of Jerusalem, Israel
2000 – 2004	**Instructor**, Mathematics and Computer Science The Open University of Israel

EDITORIAL SERVICE & ORGANIZATION

2024 – present	**Associate Editor**, *Enumerative Combinatorics and Applications*
2023 – present	**Associate Editor**, *Methodology and Computing in Applied Probability*
2017 – present	**Associate Editor**, *The American Statistician*
2017 – 2019	**Associate Editor**, *Journal of Applied Statistics*
2026	**Co-Organizer**, The 9th International Workshop in Sequential Methodologies, Washington, DC [website]

RESEARCH SUPPORT

2026 – 2027 **NSF**, Division of Mathematical Sciences, Grant no. 2553585
"The 9th International Workshop in Sequential Methodologies" (with M. Baron, American University)

2021 – 2027 **BSF**, Israel–US Binational Science Foundation, Grant no. 2020063
"Minimax online learning policies in stochastic sequential selection and assignment" (with A. Goldenshluger, University of Haifa, and A. Zeevi, Columbia University)

2012, 2013 **Summer Faculty Fellowship**, UMBC

HONORS & AWARDS

2026 Established Mathematician Award, NSF #2620717, for participation in ICM 2026

2014 NSF Registration Award, *Frontiers of Hierarchical Modeling in Observational Studies, Complex Surveys and Big Data*

2014 IMS Meeting of New Researchers Travel Award

2010 IMS Meeting of New Researchers Travel Award

2010 Travel Award, *Borrowing Strength: A Festschrift for Lawrence D. Brown*

2003 Yochi Wax Prize for Ph.D. Students, The Hebrew University of Jerusalem

2001 Rector Fellowship, The Hebrew University of Jerusalem

1996 Dean's Award, The Hebrew University of Jerusalem

1995 Dean's List, The Hebrew University of Jerusalem

ACADEMIC VISITS

2025 Department of Mathematics, Bar-Ilan University, Israel (November–December)

2018, 2025 Alfréd Rényi Institute of Mathematics, Budapest, Hungary (June 2018; September–October 2025)

2018 – 2025 Department of Statistics, University of Haifa, Israel (October 2018–January 2019; June–July 2022; January 2023; June 2023; June–July 2024; January 2025)

2024 Institute of Applied Mathematics, Vilnius University, Lithuania (June)

2022 Summer at Census (virtual), US Census Bureau (June)

2017 – 2019 Biostatistics Branch, National Cancer Institute (August 2017, 2018, 2019)

2018 Department of Mathematics, Sapienza University of Rome, Italy (January)

2015 Biostatistics Research Branch, NIAID (June–August)

PRESENTATIONS

Plenary Talk

- "Tournaments, negative dependence and distribution of extreme scores." *The 11th International Workshop on Applied Probability*, North Carolina, USA. June 2025.

Invited Conference and Workshop Talks

- "How many extreme scores are distinct in large random round-robin tournaments?" *The 9th International Workshop in Sequential Methodologies*, Washington, DC. June 1–4, 2026.
- "Negative dependence notions and tournament scores." *The 8th International Workshop in Sequential Methodologies*, Utah Valley University. May 21–24, 2024.
- "Estimation of the proportion of defective items under a group testing setting." *XIV International Workshop on Intelligent Statistical Quality Control*, Washington, DC. August 15–17, 2023.
- "On round-robin tournaments with a unique maximum score and some related results." *International Workshop on Applied Probability*, Thessaloniki, Greece (organized session: Sequential Selection, Best Choice and Games Problems). June 2023.
- "Group testing: some results and open challenges." *UP-STAT 2022 Hybrid Conference*, University at Buffalo. May 2022.
- "A unified approach for solving sequential selection problems." *Bernoulli–IMS 10th World Congress in Probability and Statistics*, online. July 2021.
- "Group testing for identifying cases of COVID-19: opportunities and challenges." *ENAR*, online. March 2021.
- "A unified approach for solving sequential selection problems." *The 7th International Workshop in Sequential Methodologies*, Binghamton University. June 20, 2019.
- "A sequential stochastic assignment problem with random number of jobs." *The 36th Annual Quality and Productivity Research Conference*, American University. June 11, 2019.
- "Conjectures on optimal nested generalized group testing algorithm." *2nd Russian–Hungarian Combinatorial Workshop*, Alfréd Rényi Institute of Mathematics, Budapest, Hungary. June 28, 2018.
- "Generalized group testing: some results and open problems." *International Workshop on Applied Probability*, Budapest, Hungary. June 20, 2018.
- "Sequential estimation in the group testing." *The 34th Quality and Productivity Research Conference*, University of Connecticut. June 13, 2017.

- "Revisiting nested group testing procedures: new results, comparisons, robustness." *Latent Variables Conference*, University of South Carolina. October 14, 2016.
- "Revisiting nested group testing procedures: new results, comparisons, robustness." *International Workshop on Applied Probability*, Toronto, Canada. June 21, 2016.
- "On the structure of UMVUEs." *The 2nd Russian–Indian Joint Conference in Statistics and Probability*, Saint Petersburg, Russia. May 31, 2016.
- "Minimax solution for the two-stage group testing problem" (travel award). *16th Annual IMS Meeting of New Researchers in Statistics and Probability*, Harvard University. July 31–August 2, 2014.
- "Invariant and minimax strategies for quantiles estimation in sampling from finite population." *Ordered Data Analysis, Models and Health Research Methods: An International Conference in Honor of H. N. Nagaraja for His 60th Birthday*, UT Dallas. March 7, 2014.
- "Some open problems in mathematical statistics: existence of UMVUEs." *Fourth International Workshop in Sequential Methodologies*, Athens, Georgia. July 19, 2013.
- "Pooling designs for outcomes under a Gaussian random effects model." *ENAR*, Washington, DC. April 3, 2012.
- "Best invariant and minimax nonparametric estimation of quantiles in finite population" (travel award). *13th Annual IMS Meeting of New Researchers in Statistics and Probability*, Vancouver, Canada. July 27, 2010.
- "Pooling strategies for outcome under a Gaussian random effects model." *American Chemistry Council meeting*, NICHD. May 20, 2010.
- "Pooling strategies for outcome under a Gaussian random effects model." *ENAR*, New Orleans. March 22, 2010.

Contributed Conference Talks

- "Hitting primes by dice rolls." *International Congress of Mathematicians (ICM 2026)*, Philadelphia, USA. July 23–30, 2026.
- "Hitting primes by dice rolls." *22nd International Conference on Random Structures & Algorithms*, TU Wien, Vienna, Austria. August 4–8, 2025.
- "Hitting k primes by dice rolls." *AofA 2025*, The Fields Institute, Toronto, Canada. May 5–9, 2025. [video]
- "Hitting a prime in 2.43 dice rolls (on average)." *160th Anniversary of Prof. Dr. Hermann Minkowski*, Kaunas University of Technology, Lithuania. June 20–21, 2024.
- "Hitting a prime in 2.43 dice rolls (on average)." *International Conference on Enumerative Combinatorics and Applications*, virtual. September 2023. [video]
- "On maximal scores in round-robin tournaments." *53rd Southeastern International Conference on Combinatorics, Graph Theory & Computing*. March 2022.
- "Sterrett procedure for the generalized group testing problem." *INFORMS Applied Probability Society Conference 2017*, Kellogg School of Management and McCormick School of Engineering, Northwestern University. July 11, 2017.
- "Evaluation of group testing algorithms in the presence of misclassification." *JSM*, Seattle, WA. August 11, 2015.
- "Minimax solution for the two-stage group testing problem." *JSM*, Boston, MA. August 6, 2014.

- "On the Nile problem by Sir Ronald Fisher." *JSM*, Montréal, Canada. August 8, 2013.
- "Monotonicity in the sample size of the length of classical confidence intervals." *JSM*, San Diego, CA. August 2, 2012.
- "Prediction of ordered random effects in a simple small area model." *SSC and SFdS Conference*, Ottawa, Canada. May 28, 2008.

Poster Presentations

- "Tournaments and negative dependence." *Rényi 100*, Budapest, Hungary. June 2022.
- "Invariant and minimax strategies for quantiles estimation in sampling from finite population" (NSF registration award). *Frontiers of Hierarchical Modeling in Observational Studies, Complex Surveys and Big Data: A Conference Honoring Professor Malay Ghosh*, University of Maryland. May 28–31, 2014.
- "Invariant and minimax strategies for quantiles estimation in sampling from finite population" (travel award). *Borrowing Strength: Theory Powering Applications, workshop in honor of Larry Brown's 70th birthday*, Wharton School, University of Pennsylvania. December 2010.

Invited Colloquia and Seminars

- "Negative dependence in tournaments and the structure of extreme scores." *Department of Mathematics, University of Maryland, College Park*. September 16, 2026.
- "Negative dependence in tournaments, distribution of extreme scores, and uniqueness of the maximum." *Department of Mathematics, Ariel University, Israel*. March 5, 2026.
- "Negative dependence in tournaments, distribution of extreme scores, and uniqueness of the maximum." *Department of Mathematics, Ben-Gurion University of the Negev, Israel*. December 7, 2025.
- "Negative dependence in tournaments, distribution of extreme scores, and uniqueness of the maximum." *Department of Mathematics, Bar-Ilan University, Israel*. December 1, 2025.
- "Hitting primes by dice rolls" and "Round-robin tournaments with a unique maximum score." *Combinatorial Search Seminar, Alfréd Rényi Institute of Mathematics, Budapest, Hungary*. September 29, 2025.
- "Some results and problems in round-robin tournaments." *Department of Statistics, University of Haifa, Israel*. January 15, 2025.
- "A unified approach for solving sequential selection problems." *Institute of Applied Mathematics, Vilnius University, Lithuania*. June 19, 2024.
- "Negative dependence notions and tournament scores." *Department of Statistics, The George Washington University*. February 23, 2024.
- "Negative dependence notions and tournament scores." *Department of Mathematics and Statistics, UMBC*. September 8, 2023.
- "Negative dependence notions and tournament scores." *Department of Mathematics, Ariel University, Israel*. June 19, 2023.
- "Group testing: some results and open challenges." *Department of Mathematics and Statistics, University of North Carolina at Charlotte*. May 5, 2023.
- "Tournaments and negative dependence." *Department of Statistics, University of Haifa, Israel*. January 4, 2023.

- "Hitting a prime in 2.43 dice rolls (on average) and on round-robin tournaments with a unique maximum score." *Rutgers Experimental Mathematics Seminar*. November 2022. [video]
- "Group testing: some results and open challenges" (Summer at Census program). *Center for Statistical Research and Methodology, US Census Bureau*. June 2022.
- "A unified approach for solving sequential selection problems" (Summer at Census program). *Center for Statistical Research and Methodology, US Census Bureau*. June 2022.
- "Group testing: some results and open challenges." *Department of Mathematics, Ariel University, Israel*. March 17, 2021.
- "A unified approach for solving sequential selection problems." *Department of Mathematics, Bar-Ilan University, Israel*. December 2020. [video]
- "A unified approach for solving sequential selection problems." *University of Maryland*. December 10, 2020.
- "A unified approach for solving sequential selection problems." *Rutgers Business School*. October 10, 2019.
- "A unified approach for solving sequential selection problems." *Department of Mathematics and Statistics, UMBC*. September 6, 2019.
- "Group testing: some results and open problems." *Department of Statistics, The Hebrew University of Jerusalem, Israel*. November 5, 2018.
- "Group testing: some results and open problems." *Department of Statistics, University of Haifa, Israel*. October 31, 2018.
- "Generalized group testing: some results and open problems." *Department of Mathematics, University of Maryland, College Park*. September 20, 2018.
- "Revisiting group testing procedures." *Department of Mathematics & Statistics, American University*. March 20, 2018.
- "Revisiting group testing procedures." *Department of Statistics, George Mason University*. February 23, 2018.
- "Nested group testing procedures and generalized GT problem." *Department of Biostatistics, University of North Carolina at Chapel Hill*. September 28, 2017.
- "Nested group testing procedures and generalized GT problem." *IBM Thomas J. Watson Research Center*. August 18, 2017.
- "Nested group testing procedures and generalized GT problem." *Biostatistics Branch, Division of Cancer Epidemiology and Genetics, NCI*. August 7, 2017.
- "Nested group testing procedures." *Department of Statistics & Operations Research, Tel Aviv University, Israel*. January 10, 2017.
- "Nested group testing procedures." *National Heart, Lung and Blood Institute, NIH*. December 13, 2016.
- "Some challenging problems in group testing." *Department of Biostatistics, University at Buffalo*. March 31, 2016.

- "Prediction of ordered random effects in a simple small area model." *Department of Mathematics, University of Maryland, College Park*. May 6, 2010.

STUDENT SUPERVISION

Ph.D. Students

2018 — **Gregory Haber** (adviser)
Now: Statistical Design, Analysis, and Modeling Group, NIST

2016 — **Maria Barouti** (co-adviser)
Now: Senior Professorial Lecturer, Mathematics & Statistics, American University

Undergraduate Students

2021 – 2022 — **Tanvi Mehta** (co-adviser), National Cancer Institute

Ph.D. Dissertation Committees

- Gaurab Hore (reader) Fall 2023
- Sidd Roy (member) Fall 2023
- Yewon Kim (reader) Spring 2022

- Zachary Zimmer (member) Spring 2014
- Andrew Raim (reader) Spring 2014
- Michelle Danaher (reader) Fall 2012

SERVICE

Departmental

2017 – present	Member, Statistics Graduate Program Committee
2013 – present	Member, Mathematical Statistics Comprehensive Exam Committee
2012 – present	Member, Probability Theory Comprehensive Exam Committee
2019 – 2023	Member, Statistics Faculty Search Committee (Fall 2019, Spring 2020, Fall 2022, Spring 2023)
2012 – 2017	Organizer, weekly Statistics Colloquium (Spring 2012, Spring 2013, Fall 2013, Spring 2016, Fall 2016, Spring 2017)
2012 – 2013	Member, Workload Committee

College, University and Community

2023 – 2025	University of Maryland Graduate School (UMGSB) Graduate Council
2022 – present	Faculty Senate: Open Access Policies
2022 – 2023	Arbitrary and Capricious Grading Review Panel
FY 2023	START Selection Committee
2012 – present	Organizing Committee, Statistics and Probability Day Conference
2012	Judge, Graduate Student Day

Grant Review

2025	Israel–US Binational Science Foundation (BSF)
2017	NSF DMS Review Panel (January)
2016	National Science Foundation (NSF)
2014	Army Research Office

Referee for Journals
